THE NEXT STEP

Most people think a floor is just something to walk on - think again!

Often the first thing people notice when visiting your premises, floors are valuable assets that frequently define who you are and what you represent and as such are a vitally important investment for companies and institutions both large and small.

So how do we make the most of such a valuable asset?

Traffik is an innovative new concept in floor care offering a range of solutions that help to both maintain and replace problem flooring at a fraction of the price associated with complete renewal. We give old floors new surfaces, new colour and new branding without the need for replacement – we turn unsafe surfaces into safer, British Standard compliant floors and provide cost effective anti-mark and even anti-static solutions.

The most important thing we do is make your existing floors last longer – saving the cost of replacement, helping protect your environment and because there is minimal disruption, saving your downtime costs as well!

THE NEXT STEP

Unique ways to make significant savings – making floors last longer

Traffik can transform old floors with a brand new long lasting surface in an unlimited range of colours, designs and finishes. Any existing hard floor can be resurfaced with a stain resistant, HSE wet and dry slip compliant and even fulfill DIN EN 61340-5-1 for an ESD accredited floor.

Soft flooring can be restored and then maintained using Traffik' Green Seal Approved Dry Extraction Systems, helping you to deliver on Cradle to Cradle goals by extending your carpets useful life by many years if not decades.

We also offer a wide range of retro-fit solutions for hard flooring including resilient, resin, tile and stone that avoid the need for replacement and can even rectify problem new floors which have damage or slip issues. Surfaces no longer need stripping and sealing; they are made as easy to maintain as any top specification floor and at a fraction of the cost of replacement, with savings of up to 60%.

THE NEXT STEP

Bespoke floor design

Traffik can turn your old worn out floors into stunning new "Works of Art" that will totally transform the image of your business. Using a revolutionary PU Design system, we can work on top of most resilient surfaces such as vinyl, linoleum, rubber, smooth concrete, ceramic and quarry tiles, resin and wood, to create amazing results - all without the need to lift and replace your old floors.

With limitless colour options, coloured flecks, printed foils and even bespoke graphic elements, we can create flooring that is as unique and as individual as you are at a fraction of the cost of conventional replacement flooring systems.

Sustainability

...cleaning 5000 square metres of carpet using the Traffik dry cleaning system, saves over 170,000 gallons of water over a typical carpets life...

Reducing the impact of your company on the environment is our priority.

We all need to protect the environment and the services Traffik provide have been specifically designed to minimise the impact your company has on the environment. This means we avoid the use of landfill sites, use water based PU systems and 'dry' rather than water extraction carpet cleaning.

All the systems and technologies we offer are designed to meet the highest standards set out in the Environmental Protection Act.

Anti-stain and ESD compliant surfaces

Specialist coatings...

Traffik's anti-colour system ensures that, stains and damaging marks from tyres, iodine, bleach and other materials that can cause permanent marking, are eliminated. The clear coat system is quick to apply, simple to maintain and is long lasting – ideally suited to applications such as car dealerships, dental surgeries, hairdressing salons and operating theatres.

Our clear anti-static ESD compliant system is available in two forms; one for fully earthed floors and one for floors that require electrostatic dissipation. Both achieving DIN Standard Accreditation.

THE NEXT STEP

Vinyl & lino

Instead of removing and replacing, the Traffik system allows you to refurbish old vinyl and lino flooring in any colour or design - with the potential to save up to 60% on the cost of replacement.

By sealing existing floors with a new surface, we can create unique bespoke floor designs that fully comply with Health & Safety Executive/British Standard slip guidelines and also achieve European DIN Standard Accreditation for ESD and fully conductive floors

Less disruption, less cost - all with no impact on the environment!

Anti-slip

Traffik is retained by many of the country's leading Retailers, Leisure and Hotel operators to help deal with floor slip issues.

Working before, during or after installation, we can advise on the suitability of your chosen floor surface and through Pendulum Testing to BS7976 determine whether your floor meets HSE slip resistance guidelines.

With a wide range of anti slip solutions, including exclusivity for world leaders No Skidding for the UK & Ireland, we can provide solutions for all types of floor surfaces.

No matter if it's wet or dry or what surface or finish your floor has - you won't slip up with Traffik!

THE NEXT STEP

Carpet Care

“...cleaning carpets using the Traffik dry extraction cleaning system, saves over 170,000 gallons of water over a typical carpet’s life...”

Dry carpet maintenance concentrates on the areas of your soft flooring that need most attention - areas of heavy footfall.

On a programmed schedule, Traffik’s carpet maintenance service removes damaging dry soil to HEPA standards, using the Green Seal Approved System that has been developed over the past 20 years - a system that is not only cost effective but also kind to the environment.

The end result? - Carpet that is not only clean but ready for use immediately or even during the process - so no disruption or downtime on valuable floor space.
