

ozteklite

fastest machines, cleanest floors

The Oztek® range of machines are revolutionary carpet and floor cleaning machines that are faster and more efficient than anything else on the market, and produce results never seen before.

The Ozteklite, our entry level machine, is:

- Low moisture technology
- Fibres are lifted, groomed and cleaned from all angles restoring pile structure
- Detachable collection modules collect damaging grit, hair and debris permanently removing them from the carpet fibres
- Contaminates and dirt are removed and not pushed back into the pile
- Floors are restored to the highest possible standard.

Because our machines are so fast, large areas of carpet or hard flooring can be cleaned in a fraction of the time of conventional systems, leaving you free to explore larger or more time sensitive projects, expand your business or spend time doing some of the other things you love!

Setting new standards for carpet and floor cleaning

The benefits:

- Efficient cleaning for carpet and profiled floors.
- Lifts, grooms and restores carpet fibres – certifiable cleaning standard including sanitising surfaces.
- Releases dirt and contaminates from fibres and surfaces – removing soil not removed by traditional methods.
- Opens up and restores carpet pile quickly and efficiently – restoring carpets to optimum standard, in many cases 'like new'.
- To give you an idea – will clean contaminated nursing home carpets at up to 100 sq metres per hour, restoring it to as new, even removing odours*.

The features:

- Quiet
- Stable and efficient cleaning head.
- Maximises the efficiency of the rotary process – leading pile lifting action.
- 25 to 28 kg head weight delivering new standards of cleaning – fast and certifiable.
- High efficiency head system.

Ozteklite 40cm

Type : Low Moisture/Dry Carpet and Hard Floor Cleaning Machine.

Suitable For : Small commercial spaces, retail, nursing homes, facilities with obstructed areas.

The 40 cm width is the simple budget-friendly option for inhouse cleaning teams, multi site service teams with a focus on residential or small commercial cleaning.

Technical Specifications:

Weight 25 kg

Height 108 cm

Motor 750 Watt – 220 V

Power 1 HP

Brush Speed 380 RPM

Ozteklite 50cm

Type : Low Moisture/Dry Carpet and Hard Floor Cleaning Machine

Suitable For : Corridors, open plan areas, hotels, commercial cleaning, pile lifting/grooming prior to other carpet cleaning processes

When the areas to be cleaned are clear, then the 50 cm wide machine is more efficient as the increased width helps clean the area more quickly, compared to the smaller machine.

Technical Specifications:

Weight 28 kg

Height 108 cm

Motor 750 Watt – 220 V

Power 1 HP

Brush Speed 380 RPM
